

DILBURY PIONEER

VOL. XXXV, No. 10

DILBURY, ALBERTA, THURSDAY, MARCH 10 1938

\$2.00 per Year. 5 Cents a Copy

O.S.A. Experimental Union.

The Olds School of Agriculture Experimental Union for 1938 again has available for distribution to its members some excellent seeds and plants of field and garden crops. These are listed below. Each member may make from one to four selections.

Anyone interested may become a member of the Experimental Union by paying an annual membership fee of fifty cents. Members of the O.S.A. Alumni Association may make selections without fee.

1. Potatoes: Vick's Early (four pound sample).
2. Potatoes: Bovee (four pound sample).
3. Potatoes: Warba Early (four pound sample).
4. Potatoes: Kathadin Late (four pound sample).
5. Fairway Crested Wheat Grass, 1/2 lb.
6. Creeping Red Fescue, 1/2 lb.
7. Timothy (Gloria), 1/2 lb.
8. 2 Rhubarb plants.
9. 20 Asparagus roots.
10. 3 Climbing ornamental plants.
11. 3 Lily bulbs.
12. 5 Perennial flower roots.
13. 5 Packets home-grown flower seeds.
14. Collection home-grown vegetable seeds—5.
15. Caragana seedlings.
16. Crab seedlings (ornamental).
17. 4 Varieties of garden peas.

Our supply of some of this material is quite limited, so some substitution may be necessary. We have limited amounts of seed of a number of the leading varieties of wheat, oats, barley and peas, but nothing strikingly new. Members who are interested are asked to write.

Orders will not be accepted after April 11th.

Membership fee of fifty cents must accompany selection. Express or postal charges amount to about fifty cents, and this should be sent at the same time.

Where there is no railway agent shipping charges must be prepaid.

Report forms must be filled in and returned to the O.S.A. at the end of the growing season.

Masons Entertain Farmer Guests.

Major H. G. L. Strange, director of the Crop Testing Plan, of Winnipeg, and Mr. Howard P. Wright, president of the Alberta Seed Growers Association, were guest speakers at "Farmers' Night," sponsored by King Hiram Masonic Lodge on Tuesday night when over 100 were present.

W. A. McFarquhar was chairman and C. R. Ford, worthy master of the lodge welcomed the guests, including the following western managers of grain companies: E. Munson, of the National Grain Co.; Earl J. Robertson, of the Alberta Pacific Grain Co.; Leo Wood, of the Bawlf Grain Co.; and H. B. Judd of the Federal Grain Co. Also superintendents L. M. Brock, of the Searle Grain Co.; Walter Bliss and Harvey Bowman, of the Federal Grain Co. Elevator agents from surrounding towns were present as were many farmer guests from Carstairs and outlying points.

Mr. Howard P. Wright, one of the largest growers of registered seed in the west and also one of the few growers of "Elite" seed in Canada, was the first speaker. He spoke on the "Mechanics of Seed production" and gave an interesting running story of registered wheat production. After describing the difference between registered and certified seed and the part the Dominion Seed Branch plays in seed production, Mr. Wright went on to the actual production of registered seed, describing minutely each of the five year stages of the operation.

Major Strange took for his subject "Crop Problems in Western Canada," dwelling principally on the marketing problem. On the definite assurance that if we get rain we will have crop, the Major first outlined moisture conditions in the province, saying that Didsbury and other districts between Calgary to Edmonton were favored with a long time average rainfall of 13 1/2 inches compared to an average in Alberta of 12 inches. He said that meant an increase of 7 bushel to the acre over the average yield. Stating that our entire economic structure depended on the production of wheat and the exporting of at least 200 millions of bushels, the speaker stressed the need of using the highest grade seed and upholding present preference for Canadian wheat and rapped the high tariffs of all countries. Selling our wheat is the most serious problem we have to contend with and though tariffs were gradually being reduced and trade agreements being arranged the speaker urged that governments be asked to reduce tariffs much more and as speedily as possible.

In answering a question regarding garnet wheat, Major Strange said it was difficult to advise, but warned the farmers if they were making a change not to sow a different wheat on garnet stubble ground, which would result in a mixture which would be difficult to get into the grades. He stated that with the new grading rules a mixture of garnet would not allow the wheat to go in the northern grades, nor would the mixture of northern wheat with garnet allow the wheat to go into the garnet grades, and as a result the mixed grain would probably go No. 5. In making the change the new wheat should only be sown on summerfallow and care should be used to seed that the seed was pure as to variety. He advocated the purchase of a small quantity of certified seed for a seed plot.

Canadian Legion Will Give Broadcasts

The Provincial Command of the Canadian Legion is putting on a series of broadcasts, giving information relative to the affairs of returned men, and inviting all ex-servicemen who are not members, to join with their comrades in the Canadian Legion, B.E.S.L.

The first broadcast will be a report on the Dominion convention recently held at Fort William. This will be on Friday, March 11. Comrade Walker, the President, will give the main report, assisted by Comrade R. W. Henderson, Chairman of the Provincial Command, and Comrade W. Bullard, Dominion Representative.

The broadcast will immediately follow the Texaco news over CFCN, that is from ten minutes past ten till twenty-five minutes past ten in the evening. Following the first broadcast there will be one each alternate Friday evening at the same time until the end of April.

Riding On Sidewalks Is a Menace

Complaints were brought to the notice of the town council on Monday night of boys riding bicycles on the sidewalks in town. This practice has become prevalent of late to the inconvenience and danger of pedestrians.

The council decided that a stop must be put to this practice, and the police have been instructed to take action against any person found riding a bicycle on the sidewalks.

WEEKLY SERMONETTE

No one can cleanse himself of his own sin. No man by his death can deliver another man from spiritual death, except only the Son of God. But Jesus being Himself free and pure from all sin, was able to obey for others.

where the farmer could develop his own seed.

Mr. Wright in answer to a question on the effect of fertilizer on "Red Bobs" stated that in his experience a fertilized crop had been from 6 to 12 days earlier than a crop not fertilized. He was also of the opinion that an increase in yield would justify the purchase of fertilizer.

After the meeting lunch was served by the members of the Lodge.

Obituary.

JOHN ALFRED MJOLSNES

From Seattle, Calgary, Innisfail and many points far and near, relatives and friends attended Knox United Church on Sunday afternoon to express love and esteem to the memory of the late John Alfred Mjolsness, whose death occurred last Friday from burns received in the tragic explosion at Turner Valley on February 27th.

Rev. J. R. Geeson conducted the funeral service, bringing messages of comfort from the scriptures and stressing the building of spiritual life for eternity and expression of God's great love in Jesus Christ. He spoke highly of the character of the deceased as he offered comfort to the bereaved family. "Breathe on Me, Breath of God" and "What a Friend We Have in Jesus," favorite hymns of the late Mr. Mjolsness, were sung, while the Junior Choir rendered the anthem, "Come Unto Me."

The casket and altar were banked high with floral tributes. Those bearing the bier were Messrs. S. L. Sande, H. R. Burgess, J. Davidson, J. Meckelberg and F. Erickson, all of Bergen, and J. Boorman of Didsbury. Interment was made in the family plot at the Bergen cemetery.

Born at Hendrum, Minn., August 26th, 1879, John Alfred Mjolsness came to Medicine Hat in 1905 and in 1907 moved to Bergen, Alberta. In 1912 he accepted the position of engineer at the Didsbury power plant and continued until the Calgary Power Co. took over the town lighting in 1928, when he moved to Innisfail to take charge of the Calgary Power plant there. Since 1932 he had resided with his family on their farm at Bergen.

Surviving Mr. Mjolsness are his wife, Hilda, three sons, Verdeen, Howard and Donovan at home; four daughters, Frances at Calgary Normal School, Mrs. W. Nichol of Innisfail, Lorna and Joyce at home; four brothers, Alfred, William and Endred of Bergen, and Martin, of Coronation; three sisters, Mrs. Victor Granum of Seattle, Mrs. Harold Clemens of Edmonton and Mrs. C. J. Erickson of Bergen.

ROBERT GIBSON

Robert Gibson, pioneer of the district and for nineteen years resident in the town, passed away on Sunday at the age of 85 years.

The late Mr. Gibson was born in Durham County, Ontario, on June 10th, 1852. He was married to Margaret S. Ferguson on December 25th, 1879. They lived in Ontario until 1905 when they came west with their family. They purchased a farm northeast of Didsbury where they lived until nineteen years ago, when they retired and moved to town.

Our Approaching Plays

Time plods on towards March 15. Clomp, clomp! Our high school students have put forth strenuous efforts, 89 per cent perspiration and one per cent inspiration.

We have practiced the puzzling of our prisoners to perfection, and Calgary has been torn asunder to unearth the tiger-skin. And hark, a bit of black advice! Those in the play are requested to refrain from washing for a couple of weeks so as to acquire the correct hue.

Ah, the second attraction of the evening! Come and see the stuttering Russian lift a prospective old maid off the shelf. Such wooings, cooings and lies you never did hear.

Swaying palm trees, sunny blue skies, greasy jungle kings, delightful music and heart-rending songs—can all be enjoyed by our anticipated audience in the Opera House on March 15th at 8:30 p.m.—The High School Students.

He is survived by his widow and three sons, Harry, of Didsbury, Sam, of Lavo, Alberta, and Milton. One son and three daughters predeceased him.

Funeral services will be held this (Thursday) afternoon at the United Church and interment will take place at the Didsbury cemetery. The Durrer Funeral Home has charge of arrangements.

Inequitable Taxation

Cogent and powerful were the arguments recently advanced by Premier Angus Macdonald of Nova Scotia in support of his advocacy of centralization of taxation in the Dominion before the Rowell Commission on Dominion-Provincial relations in Halifax when he contended that this method of taxation would be "more equitable, efficient and productive."

The Nova Scotian premier's suggestion was made more particularly applicable to income tax, corporation taxes and inheritance taxes—the latter being better known in the west as succession duties, the intention being to make these taxes national in scope with provision for the distribution of the proceeds among the provinces by a Federal grants commission "on a fiscal need basis."

On the score of greater equitability of division of taxation proceeds as between the provinces, Premier Macdonald's arguments were particularly pertinent when applied to succession duties, or inheritance taxes, declaring that in this respect the central provinces enjoy a preferred position. He backed up this statement by figures showing that in 1934 Ontario collected 59.1 per cent. of all succession duties collected in all provinces, while Quebec collected 24.4 per cent., making a total of 83.5 per cent. for these two provinces alone and leaving only 16.5 per cent. for the other seven provinces combined.

At Head Offices

The reason for the large share of succession revenues absorbed by the Provinces of Ontario and Quebec is not far to seek when it is pointed out that as the law stands to-day succession duties on intangible property, such as stocks and bonds and mortgages, are payable to the government of the province in which the assets represented by the securities are located. In interpretation this is held to mean that the duties are payable to the province in which is located the head office of the corporation issuing the securities, since, with the exception of the banks, these companies refuse to open offices for the transfer of stocks and bonds and similar instruments in the other provinces.

This situation has long been felt to be a discrimination against the maritime and western provinces, but in more recent years it has become aggravated with the collapse of realty values and the consequent transfer of considerable wealth to the intangible property form and the increasing issuance of securities for the development of natural resources.

But even worse than this, is the fact that the provinces in which the deceased was domiciled also regard it as their inalienable right to collect inheritance tax on intangible property, as a result of which beneficiaries are called upon to pay a double tax, one to the domiciliary provinces and another to the province of situs, to quote a legal term.

Futile Efforts

Some years ago efforts were made to provide for the passage of reciprocal agreements between any two or more provinces with the object of relieving estates from double taxation but so far little or no advantage has been taken of this proposal.

As far back as 1925 the inequity of succession duty taxation and the burden it is throwing upon estates, especially upon estates in the western provinces which are perforce usually very small, was pointed out by G. H. Barr, K.C., of Regina, in an interesting and informative address on the whole subject before the Bar Association of Canada in which he said:

"There has been very little reciprocity among the Provinces and it is very unlikely that this provision (providing for mutual agreements) will ever become effective. It would appear to us that instead of each Province attempting to deal individually with each other Province, representatives of all Provinces should meet at a common table and devise some plan to which they will all be party and which will automatically take effect in all Provinces at the same time."

In an exhaustive, though compact treatise on the subject, the result of over a year of laborious study and research, Mr. Barr referred to a recommendation made earlier in that year by R. M. Fisher, a Winnipeg barrister in a brief to the Manitoba Tax Conference in which he suggested, among other things, the creation of an inter-provincial board with power to adjust equitably claims of multiple taxation as between provinces and provide for some Federal body to collect and distribute among the provinces entitled to the taxes so collected.

It should be possible," said Mr. Barr, commenting upon this suggestion, "to arrange some satisfactory basis for the division of this particular tax among the Provinces entitled to share in it. If it were stock in a company the tax might well be divided among the Provinces in which the enterprise is carried on on the basis of the annual business turnover in each Province, or some other arbitrary basis making for a reasonably just apportionment."

Home-made
ICE CREAM
3 pints
for less than 20¢

Ingredients—one package Jell-O Ice Cream Powder, one quart half milk, half cream. Work—mix in bowl, put on window sill outside in cold weather, stir two or three times. The whole job will take two minutes of your time. And the ice cream! You'll be proud to say "I made it myself." Grocers sell Jell-O Ice Cream Powder.

JELLO ICE CREAM POWDER

In Rural Areas

Lightning Causes More Havoc Than It Does In Cities

Nine-tenths of the property damage caused by lightning occurs in rural areas, it is reported in the first sections of the "Code for Protection Against Lightning," issued by the U.S. National Bureau of Standards, states Science Service. Four hundred people on an average are killed each year in the United States by electric bolts from the sky.

Proper use of lightning rods sharply cuts damage to buildings struck by lightning, it is asserted. Users of lightning rods are cautioned to see that they are properly connected to the ground. Placing lightning rods on small buildings in urban areas, particularly near large buildings, is uneconomical because of the protection afforded by the larger structures, it is stated. Large buildings should always be rodged.

Persons caught out in the open during an electric storm are advised to seek shelter in as large a building as possible. Failing that, they should head for the shelter of a cliff or a dense forest. The code was prepared under the joint sponsorship of the American Institute of Electrical Engineers and the National Bureau of Standards.

FROM GIRL TO WOMAN

GROWING girls are often sufferers from female irregularities, headache, backache or nervousness. Dr. Pierce's Favorite Prescription is the vegetable tonic to give your daughter at such times. Mrs. Gladys Stevens, 16 Alexandra St., St. Catharines, Ont., said: "I felt terribly weak and nervous. I hardly ate anything and was underweight—I was miserable. Dr. Pierce's Favorite Prescription was the medicine that put me back in shape. After using it I gained several pounds, due I suppose to the fine appetite it gave me. I became much stronger and my nerves caused me very little trouble. Buy now of your druggist. New size, tablets 50c. Liquid \$1.00 and \$1.35.

Australian Defence

Can Offer Security For British Fleet In Time Of Trouble

Any doubts about the necessity for preparing, while we have leisure, for the defence of British interests in the Pacific have now been cleared away.

In any preparations of this kind Australia must play a leading role. While Australia is ill-fitted even to defend herself against a strong raiding force, much less an invader, Australia is an embarrassment, not a source of strength, to British power in the Pacific.

On the other hand, an entirely new character will be given to the situation in the Pacific when Australia on the northern, eastern and western sides can offer security to a British fleet; when Australia is the base of a considerable and self-contained air force, and the home of an industrial organization capable of supplying munitions of war to a force which otherwise would have to depend on supplies carried halfway round the world, through seas possibly made dangerous by a European enemy. —Sydney Herald.

Gave Him An Idea

Bath Tub Helped Inventor Solve Oil Company's Problem

One of the difficulties against which mining engineers who bore for oil have to fight is the seeping into their wells of water through the pores of underground sand. Now a Texas company has invented a process which will prevent this.

The inventor received his "brain-wave" when he emerged from his bath and noticed the formation of scum round the bath by the reaction of the soap to the salts in the water. Now they pump ordinary soap solution into oil wells, and this reacts with magnesium and calcium salts to form a tough curd which binds the pores and underground sands and makes the well water-tight. The process does not interfere with the oil flow. —Montreal Star.

America's first inter-colonial postal delivery of mail was made in January, 1672, between New York and Boston.

A Romantic Sea Career

Ship On India Run Has Plowed Waves For 23 Years

The beginning of the end of a romantic sea career was marked by the departure recently from Bombay of the oldest ship of the P. and O. fleet, the S.S. Kaiser-i-Hind. She has made no fewer than 104 runs from England to Bombay and "needs no steering; she can find her own way to and from Bombay," said her officers.

After one more voyage to China the ship will pass into the hands of ship-breakers. She has the proud distinction of having plowed the waves for 23 years and covered 1,508,581 miles, which is 4,319 miles short of 70 times round the world by sea.

Built for the Far Eastern service she was launched at Greenock Docks 48 days before the Great War broke out. She was commandeered to transport troops and after the Armistice was chartered to convey Australian troops home. Since then she has been on the India run. She has carried 55,000 passengers to and from Bombay. —Empire Press Union.

Interest Pays For Cake

Ceremony Originated By Actor Has Reached 144th Year

On a recent Thursday—Twelfth Night—the Baddeley Cake was cut at Drury Lane Theatre in London for the 144th year in succession. The ceremony was witnessed only by the management and the company appearing in the current play. Robert Baddeley, a pastry cook, who became an actor, left £100 in 1794, the interest to be used for the making of a cake to be eaten by the company at Drury Lane every Twelfth Night.

It's a grand and glorious feeling when you open the dictionary to the exact page on which is the word you don't know how to spell.

Every Newar girl of India is compelled to be "married" to the native bel fruit so that she will never be left a widow.

Lemon juice in water cauliflower is cooked in makes it snowy white.

I WAS NEVER SO EMBARRASSED

-FOR I KNEW THAT ACID-INDIGESTION WAS DISTRESSING TO ME AND OFFENSIVE TO OTHERS

BUT NOW—I JUST

ALKALIZE THE EASY PHILLIPS' WAY

The quick way to alkalize is this: Take two teaspoons of Phillips' Milk of Magnesia 30 minutes after eating and drinking. Or, when among others—take two Phillips' Tablets that come in a small flat tin you carry in purse or vest pocket.—You do it unnoticed.

Relief is almost immediate: "Gas," nausea, acid breath and other offensive symptoms leave.—That "stuffed" feeling and pains from "acid indigestion" cease to annoy. You feel great.

This is the way, we believe, more doctors use than any other when alkalinizing upset stomach.

The League of Nations health survey shows that before the World War men reached their full stature at the age of 25; since the war at 20. Why, nobody knows.

Through observations of the moons of Jupiter, it first was learned that the passage of light through space is not instantaneous. 2242

A "strong" flour that goes farther

PURITY FLOUR

Best for all your Baking

PF137

NEW

And Far Handier Than Older Ways!!!

Here is the most useful waxed tissue package you've ever seen.

This new pack contains 45 sheets of silver white waxed tissue. Through the top of the pack is a metal eyelet for hanging on the wall. Inside, the tissue is held in an ingenious grip so that you can withdraw one sheet at a time by simply reaching out with one hand.

"Presto-Pack" thus becomes the handiest of all kitchen aids.

You will wonder how you ever managed without it.

Warehouses at Calgary, Regina and Winnipeg

Evidence Would Indicate That Great Britain Will Be Ready Should War Come

Evidence continues to accumulate that Great Britain, while in no sense seeking war, is certainly rushing her way to effective preparedness, should war come. The new fortifications at Cyprus; the strengthening of the air base at Alexandria and of the protection of the Suez Canal; the notable additions to the air force at Singapore and the establishment there of the most powerful mobile heavy gun batteries in the world today, so far as is known; the plan—officially confirmed in London cables—to establish a strong naval and air base at the port of Freetown in the West African colony of Sierra Leone; the huge undertaking at Capetown, in the east of which Britain is sharing; and the additional warships over and above those already planned, envisaged in the speech of Sir Thomas Inskip a little while ago—there are some of the concrete proofs that the British Government is not only alert to the critical nature of the general international situation but has no intention of being caught napping by any other Power anywhere at any time.

Rumors continue to keep the cables busy. The latest credits Mussolini with having indicated that there would be big things doing in March, in connection with which he is reported to have referred to the alleged superiority of the Italian Fleet in the Mediterranean over British naval power. But it is quite on the cards that Mussolini will be reckoning without his host. Already a realignment of British sea-power has resulted in the shifting of some of Britain's newest rebuilt battleships into the Mediterranean, and it is reported on good authority that there are more to follow. The whole point of this is that Britain is the only Power which has been reconstructing upon a gigantic scale and that most of this work of reconstruction is now complete or will be within a very short time. These new reconstructed battleships and cruisers are much more modern and much more powerful than those still in commission but not yet outmoded.

Now comes news from London that within one year Britain counts upon possessing a fleet of ten thousand military airplanes—which would give her an air force more than equal to those of Germany, Italy and Japan, on the basis of the latest available estimates. Already Britain has 1,560 first-line airplanes, which is only 190 short of the number she should have to-day under the rearmament programme. Work is being speeded up weekly. But behind this first line she has a force the real strength of which has never been made public. Now this strength, it is said, will be six reserve planes for each first-line plane within a year; and as these reserves are just the same planes as the first line, that would give Britain a total air force of 12,250 planes within the twelvemonth.

Consider these facts in addition to the recent army commands shake-up, the complete mechanization of the army, and the plans for improving enlistment in all three forces—plans which are having distinctly encouraging results—and it is not difficult to perceive that Britain is thoroughly aroused and is moving with all possible speed to be in an assured position to meet any attacks that may be made.—Montreal Star.

Fish Eats Water Fleas

Supply Sent Daily To Buckingham Palace For Aquarium

Fleas go to Buckingham Palace every day but they don't bite anyone. They are specially bred food for fish in the royal aquarium.

A tropical fish expert drives into the palace courtyard with a small black bag containing a supply of water fleas. For easier handling they are semi-frozen on gauze trays.

When dropped into the water, they come to life and give the fish some exercise if not snapped up first.

"Come in, George," said the Master of the house. "He won't touch you. You know a barking dog never bites."

"Yes, I know that," came the reply, "but does the dog know it?"

For The Woman Investor

Some Hints Which Should Be Very Carefully Followed

Statistics show that much of the capital of the world is held by women, who have inherited it from fathers or husbands. To invest this wisely, that it will not be lost and will bring in a steady income, is very difficult for the woman who has been shielded by her gallant males from financial worries, as well as from the knowledge and experience which she sorely needs later.

One of the first financial axioms is: "Don't carry all your eggs in one basket." Diversify your investments putting some of the money into real estate, some into endowment insurance, stocks which you have reason to believe certain, state and city bonds, and high grade public utilities. Thus you distribute your risk. You are not likely to lose along all lines, even if one should "go bad."

Diversity of investments is not enough. Each investment should be carefully studied and found secure. Invest in growing industries, not in things which may soon be out of date, as carriages or churns.

Do not buy on too narrow a margin. If you own only a small per cent. of a bond, you may have to sell when hard times come and so will lose money on the deal. If you own the entire bond, or most of it, you can hold it until it returns to face value and have lost nothing. It is risky to invest money in foreign countries, since a war or changed laws may make your holding worthless.

Before you sign away any of your money or your rights, or make a contract, read over every word of the agreement carefully and be sure that you understand what it means. It is even wise to consult a reliable lawyer about the advisability of such a move. Have everything down "in black and white," as that is good business sense.

Appreciated In India

Air-Conditioned Train Will Make Travelling More Enjoyable

Train travel in India is notoriously unpleasant. The winter conditions our railways have to contend are reversed as India fights excessive heat. But another indication of new India is the fact that the first air-conditioned train recently made a demonstration run from Delhi to Agra and back. Four coaches were used for the journey which was a revelation to those on board of modern methods of travel and comfort for passengers in that hot country. The air-conditioning equipment made it possible to maintain a steady temperature inside the carriages, the air being renewed every four minutes. Each coach accommodates fourteen first class passengers, being divided into five two-berth compartments and one four-berth compartment. It is proposed to attach an air-conditioned coach to each mail train between Howrah and Bombay via Chhokri.—Brandon Sun.

Just What He Said

Dealer Played Safe In Recommending Horse To Purchaser

The deal was just being brought to a close.

"He appears to be the kind of horse I want," said the purchaser. "Yes, he is a fine-looking horse," the vendor answered.

"And he's a good worker?"

"When you see 'im at work you will be delighted with 'im."

The horse changed owners. A week later a heated argument was being waged between the same two men.

"And you had the — check to tell me he was a good worker! Why, 'e couldn't pull a hen off its nest!"

"I never told you nothing of the sort. Wot I said was—when you see 'im at work you'll be delighted with 'im—an' so you will!"

Having found on the doorstep of the universe a star almost as big as our solar system, Yerkes observatory astronomers plan to leave it there.

Empire's First Tapioca Plant

Will Be Erected In Honduras On Site Called Canada Hill

A. Reg. Timms, contractor of Welland, Ont., has left for British Honduras to supervise and act in a consulting capacity in connection with the erection of building and installation of machinery for what will be the only factory in the British Empire manufacturing commercial tapioca starch from the cassava root. The site of the pioneer factory has been named "Canada Hill."

The development of this industry had its origin two years ago. At that time two young men, George Patterson of Toronto and Bill Murray of Montreal, conceived the idea that somewhere in the British Empire there was a location suitable for the production of cassava roots and determined to find that location.

There followed months of investigation of possibilities throughout the Empire and they found a hidden valley in British Honduras where the cassava tree could not only be grown profitably but where the production of starch per acre was as high and higher than the East Indies.

The organization of Empire Starch Products, Limited, and the support of the British Colonial Office and the Agricultural Board of British Honduras followed.

The Government of Honduras agreed to construct wharfrage, docks and a 26-mile road from the sea coast to the valley, on the condition that the company produce a satisfactory financial set-up.

The British Government has voted \$25,000 toward provision of a suitable port and the construction of the road which follows for a great part of the way an abandoned narrow-gauge railway bed which had been used for taking out teak-wood and other hard woods from the interior.

Process Is Complicated

Laboratory Workers Find Lipstick Is Hard To Make

Have you any idea of the complicated processes that go to make beauty preparations?

Lipstick, for instance, of which a large factory can turn out several hundredweight a week.

Lipstick is temperamental stuff to make, laboratories will tell you. It may be blended to the exact formula and heated for the right time at the right temperature, and then it will come out very slightly different in color or consistency—and there is nothing to do but throw it away and start again.

When the mixture is just as they want it, they pour it into a metal mould with perhaps twenty holes. The mould unscrews into halves, leaving 20 lipsticks. It's a slow, delicate business, and the dyes, in powder form, have to be indelible and will stick to anyone working on them.—Overseas Daily Mail.

Hailstones in a summer storm recently killed two hundred sheep at Wolversuit, South Africa.

In Burma, tattooing is regarded as a fine art.

Knowledge of Buttermaking Gained From Research Work Presented to Association

Under the title of "Newer Knowledge of Buttermaking", Dr. E. G. Hood, Chief, Division of Dairy Research, Dominion Department of Agriculture, presented an important paper at the convention of the Manitoba Dairymen's Association. All the high points in butter research throughout the world for the past five years, summarized from the results of investigational work carried out in the main butter producing countries, were dealt with in the paper, including contributions from dairy research institutions in New Zealand, Australia, United States, South Africa, Germany, Denmark, Ireland, Great Britain, Sweden, and Canada.

For the purpose of presentation, the subjects under review were arranged under the following sub-heads: Neutralization; Workmanship; Wash Water; Packing; Storage and Keeping Quality; Defects; Standardization of Composition, and Laboratory Control. The main object in presenting a subject of this character, stated Dr. Hood, was to give some insight into a few of the major problems under consideration in the main butter producing countries of the world and point them out to buttermakers who have not the time nor access to the dairy literature. In addition to that, it seemed desirable to stress upon the practical man the importance of the scientific side of buttermaking, and that effort and expense have not been spared by the scientist in solving problems concerning the practical work of the dairyman of Canada. While it was generally recognized that good butter could be made even with the knowledge of to-day, many of the why's and wherefore's still remained mysterious and awaited logical explanations on a scientific basis. It was also apparent, continued Dr. Hood, that if progress were to continue and improvements in quality and method be made in buttermaking, as in other fields of industry, experimentation must continue, and the findings of such work must eventually be applied to every day practices.

Under the sub-heading of workmanship, recommendations are made in the manufacture of winter butter from butterfat with a low iodine number, and also in the manufacture of summer butter. In the case of the latter, the recommendations are three in number, namely (1) since the body of summer butter is normally soft, a relatively high wash water temperature should be used. Though wash water with a temperature as high as 60 degrees F. will increase the firmness of butter, wash water of this warmth will reduce the standing-up properties of the butter. It is probable that the optimum temperature of the wash water will be about 50 degrees F. (2) The cream should be cooled to, and held at, as

low a temperature as is practical. Cooling the cream to a low temperature will increase the firmness of the butter and also increase its standing-up properties. (3) The cream should be churned at as low a temperature as is practical. The lower the churning temperature, the firmer the butter.

With regard to packing, liners and boxes, heavy financial losses have been incurred by butter manufacturers in many countries by wood taint, surface flavours, and high colour. To overcome these difficulties, much attention has been given to this subject, particularly in New Zealand, Australia and Canada. Experiments recently conducted by the Dairy Research Institute of New Zealand show that great benefits can be secured from the use of a new butter-wrapping material, triple foil parchment, which is a sheet of aluminum foil, sandwiched between two sheets of parchment paper. Results of New Zealand experiment have been paralleled in Australia. On the basis of the findings of these two countries, it appears as if this new type of butter wrap will eventually allow countries far distant from England to land their butter into store there in the same condition as the freshly made butter forwarded more quickly from the close continental countries. Experiments in Canada conducted by Hood and White with the triple aluminum foil wrap further confirm the results obtained in New Zealand and Australia.

The casein-formalin spray method of Wiley for the treatment of butter boxes to overcome wood taint has met with considerable success in Australia. An adaptation of the method has been made by Hood and White to Canadian butter box manufacture. While its use has been limited to Western Canada, marked improvements have been found in the surface quality of the butter as compared with the older method of packing.

Numerous other papers are to be found in the literature on the wrapping of butter. These include studies on the chemical and mechanical properties of parchment paper, mould development, methods of sterilization, specially treated papers to exclude certain light rays, and the influence of the wrapper on the autoxidation of butter fat.

In summarizing the activities of the main butter producing countries of the world, concludes Dr. Hood, there appears to be ample evidence to show that the industry is progressively advancing, but as yet many problems remain unsolved. Aside from the questions involved in the procurement of high quality cream, further scientific knowledge is needed on butter, relative to its structure, microbiology, and chemical composition, as well as its nutritional aspects, before the fullest benefits can be derived by the industry.

Exercised Their Rights

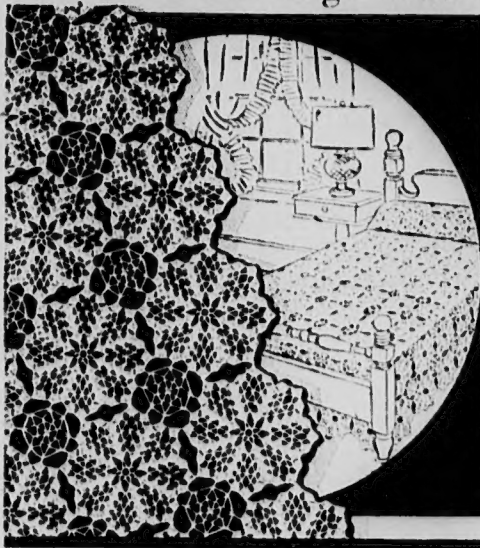

Grenadier Guards Marched Through London With Bayonets Fixed

The steamship Dunera arrived at Southampton recently with the Second Battalion, Grenadier Guards from Egypt, and the First Battalion, the Duke of Wellington's Regiment, from Malta.

The Second Battalion, Grenadier Guards, exercised its ancient right of marching through the City of London with bayonets fixed, drums beating, and Colours flying. In accordance with custom the City Marshal (Commander J. B. Poland) challenged the battalion at the city boundary, and on the commanding officer replying, "The Second Battalion, Grenadier Guards, exercising their ancient privilege and right to enter the City of London with Colours flying, drums beating and bayonets fixed," the Marshal replied: "I have it on the authority of the Lord Mayor, to receive and attend your regiment through the city."

The City Marshal escorted the battalion through the city, and the Lord Mayor took the salute from the balcony of the Mansion House.—London Times.

Crochet Works Magic With String

Household Arts by Alice Brooks

Crochet Then Join Medallions for Cloth Scarf or Pillow Top

PATTERN 6039

Your hook acts like a magic wand as you crochet these exquisite medallions in string. They count up so quickly, you'll have enough to sew together for a beautiful spread, cloth, scarf or pillow before you know it! They measure 7½ and 2½ inches in string—smaller in finer cotton. In pattern 6039 you will find complete instructions for making the medallions shown; an illustration of them and of all stitches used; a photograph of the medallions; material requirements.

To obtain this pattern send 20 cents in coins (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The World of Wheat.

By H. G. L. STRANGE

Director, Research Department
Searle Grain Co. Ltd.

"The United States' Government has decided to release 100 million dollars' worth of gold every three months from the vaults where it has been 'sterilized,' so as to permit the yellow metal to expand the credit base of the United States."

This is important news indeed, for it means that the vast hoard of gold which has been accumulating in the United States since 1933 will, at least, be permitted to make its weight felt in raising commodity prices.

As compared with 1913-14 the currencies of the United States, Canada and Great Britain have been inflated by 69% and since 1932 the world's production of gold has been about 40% greater each year than previously.

The factors, separately and together, tend greatly to increase the price of all commodities, for gold and money are the yardsticks which measure price. It means that as soon as the existing governmental restraints on the full use of gold and credit are removed, then all prices, and so the cost of living and production will tend to rise by 69 per cent or more as compared with pre-war prices.

Commodity prices so far have only risen by 25 per cent, and the cost of living by 36 per cent, but world wheat at Liverpool, and Chicago wheat prices, are still at pre-war levels.

Following factors have tended to raise price: Russia buys Australian wheat -- 1938 world winter wheat acreage less than a year ago -- Argentine government states 40 per cent of seeded corn acreage is total loss -- South African government authorizes importation of wheat and flour -- Mexico authorizes importation of corn free of all duty.

Following factors have tended to lower price: Further beneficial rains received in U.S. winter wheat belt -- Algerian wheat production greater than last year -- Bulgarian and Belgian wheat, rye and barley all greater than last year -- Exports of new wheat from India will commence April 1st -- Wheat prospects in Greece, the Balkans and Hungary mostly favourable.

Items of Interest

The provincial government was asked to inspect all oil refineries when being constructed, and when in operation, and to make obtaining of a license necessary before refinery operations were allowed to be started, in jury verdict at the inquest Saturday into the deaths of Ezra S. Bowden, his son Louis Bowden and J. A. Mjolsness. Cause of the death of all three was found to be burns and injuries received in an explosion of a still at Economy Oils Limited refinery.

Recommendations for a \$400,000, 000 irrigation construction program which, it is claimed, would put from 30,000 to 60,000 men at work for eight years, have been submitted to Prime Minister Mackenzie King by the Saskatchewan-Alberta Irrigation Association.

The Value of Seed Treatment

Much experimental work has been done to devise methods for the prevention of losses from fungous and bacterial diseases which are seed-borne. It has been shown generally that any benefits derived from seed treatment can be traced, as a rule, to the control of organisms which are present either on or in the seed or in the seed bed. Some experiments seem to show that treatment of disease-free seed produces benefits in the form of stimulation. This is not necessarily true, since diseases are not always evident externally, and the apparent stimulation may be in reality an increased vigour due to the control of some parasite which is not evident. On the other hand, when germination is delayed by cold wet soil, fungicidal dusts may protect the seeds and seedlings from attack by soil organisms.

The average annual loss in Canada cereals mut diseases for the period 1920-23 was estimated to be over \$12,000,000. During the 12-year period 1920-1932 20,000,000 bus. of Western Canadian wheat were graded smutty. This represented a direct loss of approximately \$1,000,000 due to reduction in grade alone. A quite different disease is common rootrot which is widespread and often severe on cereals in the prairie provinces. Losses from this trouble were estimated \$6,500,000 annually in Saskatchewan for the three-year period ending 1930. A recent survey of available seed records show that about 60 per cent of wheat seed samples carry fungi of some kind. Some are important as causes of rootrot, while others only attack broken and injured seeds.

Proper treatment of the seed of cereals will destroy the spores of smut, rootrot and moulds. In this respect, it should be mentioned that certain dust fungicides are becoming popular because of their ease of handling and general efficiency. Organic mercury dusts, sold under various names, are very effective against smuts, and tests conducted at the Dominion Laboratory of Plant Pathology, Saskatoon, have shown that they likewise control rootrots to some extent. Formalin is very effective in the control of smuts but frequently causes seed injury.

Information on the condition of seed grain and the use of fungicides can be obtained from Dominion Laboratories of Plant Pathology at Ottawa, Winnipeg, Saskatoon and Edmonton.

Burnside Notes

Mr. Albert Spraggs spent Monday with Mr. and Mrs. Joe Clarke.

Mr. Denis Jenkins was a Monday evening visitor with Robert Eckel.

Miss Gretna and Mr. Dick Metz visited Mr. and Mrs. Otto Bittner on Sunday afternoon.

Mr. and Mrs. Charles Mardon and son Charlie were Sunday visitors with Mr. George Metz.

Mr. and Mrs. John Viney and family, Dave Hughes and Morris Charlton, of Acme, spent Sunday at Mrs. N. Eckel's.

Miss Gretna Metz of Calgary is spending a week with her father, Mr. George Metz, having attended the funeral in Didsbury last week of her aunt, Mrs. Allan Dedele.

Mr. Percy Saunders went to Calgary on Wednesday to attend the funeral of his brother-in-law, Mr. Mike Sheridan, who passed away at the Keith Sanitarium on Wednesday morning. The funeral will take place Friday.

Lone Pine W.I. met at the home of Mrs. Bert Pross last Thursday. There was a splendid attendance, as roads and weather were fairly good. Plans were made for the W.I. concert and dance on March 18th. A spelling match added much enjoyment to the afternoon. Mrs. Smith won the 10 cent draw.

Melvin Notes.

Mrs. S. Troyer and Miss Ruth Johnston of Didsbury spent Sunday with the Johnston family.

Miss Emily Shantz of Calgary was a weekend visitor with her parents, Mr. and Mrs. Elah Shantz.

Mr. and Mrs. Rube Lynch of Midnapore visited on Tuesday with Mr. and Mrs. August Krebs.

We are pleased to see Mrs. Farant out and around again after her accident.

We are sorry to hear that Mr. Fred Hyde is not keeping as well as we would like to see him.

Come to Melvin Hall this Friday evening, March 11th, and dance to the music of Munroe's Original Pioneers.

A number from the district attended the shower in honor of Mr. and Mrs. Don Dunphy at the Garfield school Friday night.

The first whist drive of the season was held in the Hall on Monday night. There will be a bridge drive Monday evening, March 14th, and we hope everybody will turn out. Ladies please bring light lunch.

Westcott Notes

Mrs. J. A. Mjolsness and family wish to take this opportunity to express their appreciation to the members of the United Church congregation at Westcott for so kindly giving up their service on Sunday, March 6th.

The next meeting of the Westcott Literary Society will be held on March 18th—a week earlier in the month than usual.

Rugby Notes

The March meeting of Rugby W.I. was held at the home of Mrs. Carlson. The way was long, the day was cold and, oh, the roads were exceedingly rough, but there was a good attendance of 28 members and two visitors. After the business session was finished Mrs. John Graham gave an excellent talk on "Gardening," and a lively and useful discussion followed. She also gave a short sketch on fur farming, showing how much it was increasing in Canada. A contest on the hidden names of vegetables and fruit finished the topic for the day, prizes going to Miss S. Landeen and Mrs. Campbell. We noticed that the flower slips were conspicuous by their absence. The April meeting will be held at the home of Mrs. A. Cowitz, with "Home Economics," under convenerhip of Miss H. Wahl as topic for the day. Members please bring quilt blocks.

Notes From the West

Mr. and Mrs. W. F. Brown and Mr. and Mrs. O. Krebs were visitors in the capital city for the weekend.

Mr. and Mrs. E. Lowrie were Sunday visitors with Mr. and Mrs. A. Hogg.

A good time was reported at the dance at Elkton on Friday. Look out for the next one on March 25th.

A large crowd gathered at the Elkton school on Monday evening for boxing.

Mrs. A. Hogg is spending a few days this week with her daughter, Mrs. A. Orde.

Carstairs E. Community

The Hall dance was well attended last week, and the next one will be held Friday, March 18th.

W. H. Rieder has purchased a new M.-H. twin power tractor with rubber tires.

Miss Alex Stewart who underwent an operation at the Didsbury Hospital, returned home last week and is doing fine.

Mrs. W. H. Rieder held a shower last Friday in honor of her sister, Miss Idella Fox of Carstairs, who is a bride-elect of the month.

Mr. R. L. King has returned from Calgary where he had been taking medical treatment. We are sorry to hear that he has not fully recovered from his illness.

A farewell party was tendered to Mr. and Mrs. N. W. Kane and family at Selkirk school last Friday by a large number of friends. The family will move to Coburg, Ontario, next week, where in future they will reside.

Who Owns the Assets of Life Insurance Companies?

Answer.—These assets are jointly owned by more than 3,500,000 policyholders—men and women who constitute one-third of Canada's population.

Question.—What is the average share of each policyholder in these assets?

Answer.—About \$571. This shows that Life Insurance assets are made up of the savings of millions of thrifty men and women.

Q.—What is the nature of Life Insurance funds?

A.—They are trust funds held by the Life Insurance companies to pay policy claims as they fall due.

Q.—How are these funds invested?

A.—In loans to governments and municipalities—for building homes and schools—for improving farms—for constructing good roads and transportation systems—for developing industries and public utilities.

Q.—To what extent does Alberta share in such investments?

A.—More than Ninety Million Dollars of Life Insurance funds are invested in this Province.

This is the third of a series of messages, sponsored by Life Insurance Companies operating in Canada. The fourth, to appear in two weeks' time, will discuss Life Insurance investments.

Important Western Industry

Opening Of Plant Of General Motors In Regina Fosters New Spirit Of Optimism In West

Since the official re-opening of the Regina plant of General Motors of Canada Limited on December 16, an ever-increasing interest has been evinced in the far-reaching significance of this industrial renaissance in the West.

Business and public men who attended the opening ceremonies at the \$2,200,000 plant following completion of a \$700,000 modernization program, joined in expressing the view that General Motors' action has done much to foster a new spirit of economic optimism in the West. At the same time, they stated that it is an important step on the road to diversification in Saskatchewan. In this connection, Premier W. J. Patterson of that province remarked in his address, "The re-opening of the General Motors' plant, in addition to giving employment to a substantial number of people, is an important recognition of the industrial possibilities of the West. Coming at a time when the province is experiencing such serious difficulties, this action on the part of the company is welcome and encouraging."

Other speakers pointed out that re-opening of the Western factory meant that work was assured for a regular staff of about 400 Western Canadians, while programs of associated industries are expected to provide additional employment. Designed to supply the entire western demand in Canada, the plant, present plans indicate, will provide work for many employees over the greater part of the year, while the monthly payroll is estimated at approximately \$60,000.

The interest of the prairie people themselves in the re-opening of the big factory is reflected in that fact that close to 9,000 persons witnessed the assembly lines swinging into action as the 1938 car building schedule was launched. A western production program of 10,000 units was announced by Harry J. Carmichael, Vice-President and General Manager of General Motors of Canada Limited.

At the opening ceremonies while newspaper and newsreel cameras clicked and broadcast commentators described the proceedings, provincial and civic leaders extended a warm welcome to General Motors' executives. Accompanying Mr. Carmichael from Oshawa were C. E. McTavish, General Sales Manager, and James B. Highfield, General Plant Manager.

It was recalled that nine years ago when the plant was built, the first car off the assembly line was presented by R. S. McLaughlin, president of the company, to the Saskatchewan branch of the Red Cross Society. Since that time, W. F. Marshall, Red Cross Commissioner, and other society officials have driven the car 65,000 miles on errands of mercy in all parts of Saskatchewan's drouthland, and it is still in service.

With the re-opening of the plant, the first 1938 car off the assembly line, a Chevrolet coach, was again placed in the service of the Red Cross. Mr. Carmichael handed the keys over to Hon. A. P. McNab, Lieutenant-Governor of Saskatchewan, who in turn presented them to Mr. Justice W. M. Martin, president of the Saskatchewan Division of the Red Cross.

In the course of his address, Mr. Carmichael pointed out that more than 130,000 Canadians depend upon the automobile industry for their livelihood. The wages, he stated, were the highest paid to any class of industrial workers in the Dominion. He earnestly emphasized the problem created by the present low tariff on finished cars brought into the Dominion, stating that one company had discontinued Canadian operations, while a second had practically suspended activity and a third contemplated leaving the Canadian field.

Most advice is free, so you don't lose anything unless you make the mistake of following it. 2242

FLIN FLON

"The Story of Its Finding
and Position To-day"

By PRATT KUHN

Continuing the story of Island Falls, where the electric power comes from.

The thing that interested me, however, was the conquering of the wild, the erection of 356 steel towers carrying power 60 miles, and the line patrolmen who live with their families at mile 13 and mile 38. These men walk steadily, examining the conditions of wires, posts, possible dangerous fires, etc., and report by telephone from one of the eight telephones on the route. Occasionally they can hitch-hike a ride on a boat going down the lakes and walk back.

At mile 13 a wood pole, single circuit, aluminum cable line 40 miles long taps off through air-brake switches to feed the Sherritt-Gordon mines.

I asked the patrolmen, both of whom I met by good luck, if they weren't lonely, but mile 13 is close enough to Flin Flon to have visitors, and at mile 38 they are lonely only in summer, while in winter they feed teamsters twice a day—men hauling supplies to Island Falls over the ice.

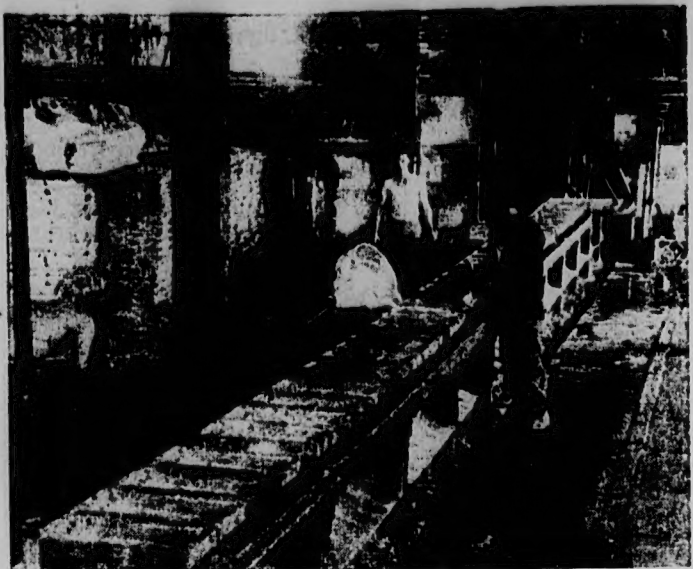

This supply business is mighty important because you can't run down to the corner store for something forgotten, and you must have a year's supply on hand at all times. In winter, then, about 200 tons, valued at \$30,000 to \$50,000 of stock and provisions are hauled in and stored in warehouses for non-perishable food stuffs. There is a heated room for the storage of freezable foods, and an ammonia refrigerating plant maintains cold storage for packing house provisions.

Believe me, I ate beef in July that had been brought in the previous December and it was better than you'd buy in the city, because every chop, roast, chicken, etc., is government inspected then wrapped separately in cellophane, quick frozen and kept that way till the housewife gets it.

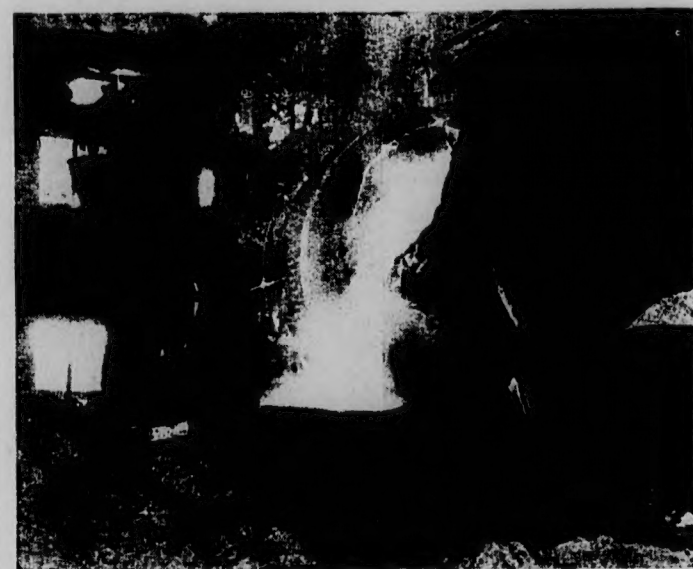

The company store is excellently laid out, and carries every good branded line of drugs, cosmetics, canned goods, silk stockings, etc., and marvellous to relate, sells at less than city prices, despite the cost of hauling and storage.

Some part of the stock consisted of unknown lines to me, but was for trading with the Indians, a town of Crees (Roman Catholics) being established on the mainland three miles away, whose men folk do logging and brush work around the properties. There are about 30 employed, and who are entitled to buy at the Company store at the same prices the white residents pay. This is some difference to the way it used to be when the Indian was fair game for the white trader. However, all through my studies I was deeply impressed with how the company went out of their way to treat employees fairly, and with the satisfaction expressed by the men and women workers both here and in Flin Flon.

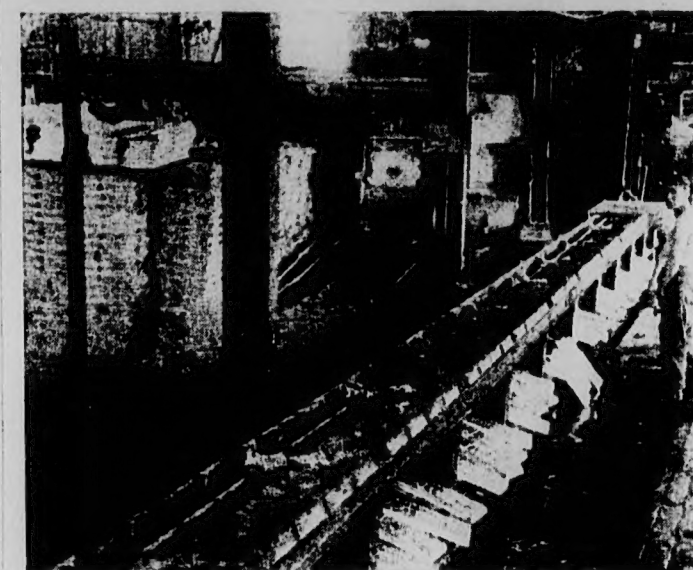

Getting up to Island Falls from Flin Flon was easy. I took a taxi to Channing flying field, six miles out, stepped into an Arrow Airways plane with Jeff Home-Hay as pilot, and in 40 minutes descended on the water at the dam and taxied to the wharf. Getting back I wanted to see the water route, so started out at 8:45 a.m. from the store where all the passengers gather and walked to Sawdust Bay. There outboard motors were placed on two canoes, dunnage piled in and away we went with "Capt." Jim Clark in charge, across Sandy Bay, 3½ miles to a half mile portage at Muddy Lake, where a Linn tractor pulled a wagon with the freight, and passengers walked.

Molten zinc being poured into molds at Flin Flon. Man at right is levelling top. In left background are these 50-lb. zinc bars cooling off.

This is molten copper pouring from smelter converters. It will be carried from here by the overhead trolley to the casting machine. 1937 photo at Flin Flon mine, Manitoba.

Zinc slabs, glowing with heat, dumped from the molds. Men with tongs grab them one at a time and swing twenty onto a truck at Flin Flon.

SCENES AT RE-OPENING OF GENERAL MOTORS REGINA PLANT

Interesting ceremonies marked the re-opening of the \$2,200,000 Western plant of General Motors of Canada Limited at Regina recently when provincial and civic leaders joined in welcoming General Motors' executives. The above illustrations show, upper row, from left to right: the assembly line in the plant following completion of the 700,000 modernization program; centre, the first 1938 car, a Chevrolet coach, made at the Regina factory. The keys of the car

were turned over to Hon. A. P. McNab, Lieutenant-Governor of Saskatchewan, by Harry J. Carmichael, vice-president and general manager of General Motors. His Honor then presented them to Mr. Justice W. M. Martin, president of the Saskatchewan Division of the Red Cross. In the foreground beside the car are Mr. Carmichael, Mr. Justice Martin and Mr. Justice Mackenzie. Another factory operation is shown in the third picture. Lower row portrays, first,

a group of workmen; centre, a scene at the Board of Trade dinner, the group comprising, from left to right, L. A. Thornton, president of the Regina Board of Trade; C. E. McTavish, general sales manager, General Motors Products of Canada Limited; Premier W. J. Patterson of Saskatchewan; and His Honor A. P. McNab. The third picture shows J. B. Highfield, general plant manager, General Motors, being interviewed during the broadcast of the proceedings.

WHEN COLDS BRING SORE THROAT

Relieves
THROAT
PAIN
RAWNESS

Enters Body
Through
Stomach and
Intestines to
Ease Pain

The speed with which "Aspirin" tablets act in relieving the distressing symptoms of colds and accompanying sore throat is utterly amazing... and the treatment is simple and pleasant. This is all you do. Crush and dissolve three "Aspirin" tablets in one-third glass of water. Then gargle with this mixture twice, holding your head well back.

This medicinal gargle will act almost like a local anesthetic on the sore, irritated membrane of your throat. Pain eases promptly; rawness is relieved.

"Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

CHAPTER V.—Continued

"Please show Mr. Punder out." Punder stood there, looking more bull-like than ever.

"Do you want to be shown out, or thrown out?" said Ernest. "I give you ten seconds to decide which."

He pulled out his dollar watch. "I'll go," said Punder. "But, mark my words, I'll be back. Hah!"

He jammed his silk hat on his head and strode out of the room, sizzling. When he had gone the earl said,

"I didn't like to him very much, did you?"

"Father," said Rosa, "I'm frightened."

"But why, my dear? the bogeyman has gone. And did young Ernest hear the lion? I'll say he did. Nice lion-bearding, Ernest, my boy."

"But, father," said Rosa, "you don't know Punder."

"We've met."

"You don't realize what a spiteful, ruthless, unscrupulous man he is," she said. "I've heard stories about him. Getting his own way is an obsession with him. Now we've got his back up, and a Punder never forgets. When he says he'll be back, he means he'll be back; and, in spite of what our family crest reads, are we really prepared to fight a powerful brute like Punder?"

"Oh, he was bluffing," said the earl.

"No he wasn't," said Rosa. "He'll be back."

"Let him come," said the earl. "I forgot to ask him how the deuce they pack stuffed olives in bottles so that all their little red noses press against the glass."

"We've made a cruel enemy," Rosa said.

"And I'm afraid I'm to blame," said Ernest, who, having discharged his blast of temper, felt a bit empty and apprehensive.

"Nonsense," said the earl. "You made a sporting gesture. I was afraid for a moment you were going through with it."

"So was I," said Rosa.

"But will he do anything, do you think, sir?" asked Ernest.

"He may. Pelt us with pickles, or something like that," said the earl, unperturbed. "But we should worry, what? Are we Bingleys or are we bobolinks?"

CHAPTER VI.

If, for the thing seemed more than possible, Ernest Bingley had awakened to find himself not in a behemoth bed in a castle in Somersetshire but in his own spartan cot in his Iowa studio, surrounded by odds and ends of owls and others, it would have been a disappointment, but hardly a surprise. For five incredible days he had been master of the demesne (at a price); but the castle and those who dwelled therein still had a mirage-like quality for him. Momentarily he expected Lady Rosa to turn into a white dove before his bewitched eyes, and fly away. He kept stealing secret glances at the earl to detect signs that that nobleman was becoming a kobold after the protean fashion of the chameleon characters that populate the dream-world. At intervals Ernest inflicted on his own person a rather painful pinch, an act which did not go unnoticed by Crump, or undiscussed in the servants' hall.

"Pinches himself, does he?" commented Mrs. Featherby, as she went about her culinary chores. "Well, that's his privilege. He can pinch himself till he's all over black spots like a leopard, so long as he does not try to pinch me."

"Nevertheless and notwithstanding," said Crump, "I consider such conduct unbecoming in a millionaire, if such he be, which I still beg leave to doubt. If you could see his underwear, Mrs. Featherby—"

"Mr. Crump! Please! You forget yourself!"

"So very sorry, Mrs. Featherby. I wish I could forget myself."

He released an out-size sigh.

"I know what you're going through," said the cook. "But we must bear our crosses, as I remarked when the late Mr. F. passed to his reward."

"Let's not talk of my loss now," said Crump, "if you don't mind. The past is past. It's the future that worries me now. Did you know that I am psychic?"

"Are you really, Mr. Crump? The late Mr. F. saw things, but that was after a spell of drinking."

"I," said Crump, "am not a drinking man. And I do not see things. I have premonitions."

"Dear me, how dreadful," said Mrs. Featherby. "A nice cup of tea now—"

"Thank you. But even tea, Mrs. Featherby, will not quiet my fears. I suspect dirty work at the cross-roads, and dirtier to come. And I hate to see the family put upon."

"So do I, and them so kind and all," said the cook. "Is he planning to

murder them in their beds do you think?"

"What I'm afraid of," said Crump, glumly, "is that the day is not far off when they'll have no beds to be murdered in."

"Then you think he is up to some jiggery-pokery?"

"Downright tiddly-boodily, Mrs. Mrs. Featherby," said Crump.

"Of what sort?"

"Ah!" said Crump. "That remains to be seen."

"It's plain he's a bit potty," Mrs. Featherby said, "but he does not seem like a wrong 'un. I've always found him civil-spoken and quiet. I must say."

"Ah!" said Crump, and packed a world of meaning into the sound. "Those quiet ones! The lion stalking its prey is quiet enough, Mrs. Featherby, or so I am informed. But if you'd seen what I saw—"

"What did you see, Mr. Crump?"

"The real lion," said Crump, darkly.

"When? Where?"

"It was the day that Punder person was here," he answered. "Our millionaire, granting for the sake of argument he is one, showed his claws and teeth then I can tell you. He pitched into Punder and told him off properly. Yes, he showed lots of lion. I must say I had to like him for it, in a way. It takes pluck to tackle a Punder."

"It must. Poor dear Stanley—I refer to my late husband—worked in one of Punder's jam factories. He was treated outrageously, and though Stanley loved a good fight, especially when on the drink, he never dared tackle Punder."

"I find myself wishing," Crump said, "that our millionaire really is one; but it takes more believing than I can manage. There's something as fishy as a mess of haddock about him; and I'm considered a good judge of men."

"And women?" asked Mrs. Featherby, with a coy smile.

"And women," replied Crump, returning it with interest.

"Is he an old lag do you think?"

"I don't say he is a criminal," said Mr. Crump, "but I don't say he's a millionaire, either. He hasn't rich ways, and he is not posted on the usages of society."

"Things are different in the States, my sister writes me," said the cook. "Shouldn't wonder if at home he lives in a wigwam."

"I wish—" began Crump, and paused, the wish unuttered.

"Tell me your wish," coaxed the cook.

"Rather not."

"Has it anything to do with me?" she asked, archly.

"No," he said. "I mean we'll take that up later. Just now we are discussing that foreign party. My wish is that he is all he represents himself to be. It could solve a lot of the family's problems, Mrs. Featherby."

"Could it not," said the cook. "I'd rather see almost anybody, even an American, marry that sweet lamb

than old Frostyphiz the Knuckle-cracker."

"My dear Mrs. Featherby," said Crump, "you have been in service here too short a time to speak in so flippant a fashion of a member of one of our oldest county families."

"But that's what all the servants call him," she said. "And, besides, it is just between you and me, Cecil."

She accompanied her first use of his first name with so coquettish a look that Crump, hardened bachelor that he was went shrimp-pink. She followed up her advantage.

"You don't like him yourself, Cecil. Own up."

Crump set down his tea-cup.

"My like or dislike of Captain Duff-Cooper is, to him, I darsay, a matter of complete indifference," Crump said. "As a gentleman and a guest in this house he is entitled to receive and does receive from me my best and most respectful service."

But, he added, suddenly dropping his drawing-room tone, "between you and me and that rolling-pin, my dear Sylvia, I detest the big blister." "Another cup of tea, Cecil?"

"Thank you so much, Sylvia, but I must decline. Duty calls. But we must have another little chat in the not too distant future."

"The pleasure will be mutual, Cecil," she said.

"Till then, Sylvia," said Crump, and, with a languishing look, he left her.

"Crump's tour of inspection to see if the dusting had been done diligently took him to the library. At first he did not notice Ernest, sunk in a sofa and ambushed behind a dense book, a history of the part played by sundry stalwart Bingleys in the Wars of the Roses, one of the few tomes about the exploits of his clan with which he was not familiar. Ernest saw Crump first, saw a look of indigo woe on a visage which was, usually, as expressionless as a trout.

"Beg pardon, sir," said Crump. "I was not aware you were here. I thought you were in the potting-shed with his lordship."

"I was there," said Ernest, emerging from the middle ages. "But I'm not there now. I'm here."

He was never at his best with Crump. The butler was invariably polite and obliging, but he had a way of looking askance at Ernest which was most disconcerting. Ernest, by nature as sensitive as a sun-burned poet, suspected that Crump suspected him of skulduggery.

Recalls Old Experience

Sir William Mulock Tells Story To Bank Shareholders

Sir William Mulock once drove in a "rickety, old two-horse cab" containing nearly a quarter of a ton of gold through the streets of Toronto.

The former chief justice of the Supreme Court of Ontario told of his experience at the annual shareholders' meeting of the Dominion Bank, of which he was the first legal adviser.

At the first meeting of shareholders in 1871, Sir William was appointed secretary, and later, solicitor for the bank.

"I have had some connection with this bank, extending over nearly two-thirds of a century," said the speaker. "The shares, or most of them, which I took when the bank opened, I still have."

When the bank was founded the law stated that no bank could issue its own bills until it had \$100,000 in gold actually in its treasury. Sir William recalled.

"That time arrived," he continued "but in the meantime the bank had temporarily deposited at interest its capital not required for its daily business with another bank. The manager, Mr. Bethune, asked me to go down to the bank with him to draw out that \$100,000 and put it in our own treasury, so that the bank might issue its own notes."

"So we went down to the other bank in a two-horse cab, a rickety old cab, and I was to stay in it while he went in and brought out the gold," Sir William recounted. "They brought out so many bags that we feared the floor would give way before we got over to our own banks—the roads were bad and rough."

"At all events, the gold weighed nearly a quarter of a ton. But we carried it safely and deposited it. Later on, some little time afterwards, an issue of bank notes came out. I bought the first two—two \$1 bills—and presented them to the bank as a memorial."

LOCAL & GENERAL

Church of England services will be held on Sunday afternoon at 8 p. m.

Mrs. E. G. Ranton is visiting with relatives in Edmonton this week.

Mr. Otto Fischer, of Calgary, was in town Tuesday looking up old friends.

Miss Rena Mowers, of the Royal Bank staff, left Saturday to spend her vacation at her home at Sibbald.

Mr. Elmer Evans, of Calgary, was a weekend visitor with his parents here.

The Twentieth Century Club's "Roman Holiday" has been postponed until Tuesday, March 15th. Don't forget to come.

Mrs. J. Boorman went to Edmonton on Monday evening to attend the W.M.S. convention which is being held this week.

Mr. Art. Boorman, who is employed with the Imperial Oil Co. at Turner Valley, visited his home here during the weekend.

Mrs. W. D. Spence went to Banff last Wednesday to take treatments. We are glad to hear that she has somewhat improved.

Mr. and Mrs. Howard Halliday and Mr. Al. Thomas motored to Calgary on Tuesday to take in the Glencoe ice carnival.

Bert Cressman of Raven, Alberta, is spending a couple of weeks here visiting old friends. Bert says it is three years since he was in town.

A merry-go-round of hilarity! It doesn't make sense, it makes laughs! "Easy Living," at the Opera House Friday and Saturday, with Jean Arthur, Edward Arnold, Ray Milland.

General meeting of the Twentieth Century Club will be held tonight (Thursday) in the club rooms at 8. All members are requested to attend.

A meeting to organize a "bigger and better tennis club" will be held in the Twentieth Century Hall this Sunday afternoon, March 13, at 3. All interested should attend.

Word has been received of the death on February 20 of Mr. Charles Murphy of Sergeant's Bluff, Iowa. Mr. Murphy was known in the Didsbury district, owning several pieces of land west of town.

The W.M.S. of Knox United Church will meet at the home of Mrs. J. Boorman on Tuesday, March 15, at 3 p.m. Members and anyone interested are cordially invited.

Miss Jessie McCoy, of the University Hospital at Edmonton, is spending a two-weeks' vacation with her parents, Mr. and Mrs. W. J. McCoy.

J. W. Halton was slated to take a rink to the Innisfail invitation bonspiel on Wednesday. The spiel, however, was postponed on account of soft weather.

Amateur Night at the Community Hall on Friday, March 25th, under auspices of the Mountain View Women's Institute. Admission: Adults 35c, children 15c, family ticket \$1.

The friends and members of the W.C.T.U. will be welcome at the home of Mrs. J. R. Cunningham this (Thursday) afternoon at 3 for the regular meeting. Mrs. Eldon Deadrick will have as her topic, "Medical Temperance." Some important discussions will be brought before the meeting.

The Junior Choir of Knox United Church will hold a St. Patrick's family party on Friday, March 25, in the basement of the church at 8 p.m. Admission: Adults 25c, children 10c, family ticket 50c. A good time assured. Everybody welcome. The proceeds will enable the choir to sing over station CFCN on Saturday, March 26, from 8:30 to 9 p.m.

The Knox United Church was the scene of a music recital on Monday evening by the pupils of Miss Evelyn Liesemer. The church was well filled and the program was excellent, each item receiving well-merited applause. Assisting artists were Mr. Hans Olsen (violin), accompanied by Mr. Orville Kirk at the piano. Miss Liesemer was the recipient of a beautiful bouquet presented in behalf of her pupils by Miss Betty Boorman.

Alberta Wheat Pool Moving Pictures

Every stage in the life of wheat was portrayed by moving pictures sponsored by the Alberta Wheat Pool Company at meetings held last week at the Mountain View Community Hall east and the Melvin Community Hall west. About 80 farmers in the east district watched the development of wheat from the sowing stage through to the delivery to the co-operative mills in England and ultimately to the consumer in the form of bread. About sixty were present at the west meeting.

Prior to the pictures, L. Hutchinson, son, president of the company, addressed the gatherings, outlining the aims and accomplishments of the Alberta Wheat Pool. A report of the recent annual meeting of the company held at Calgary was given by delegate H. L. Taggart. Older, Fieldman W. Pettinger operated the moving pictures.

"Easy Living" Whirlwind Laugh Fest.

Who's the guy who said something about pennies from heaven?

It's dollars—fifty thousand of them—for beautiful Jean Arthur, in the shape of a gorgeous sable coat in "Easy Living," the delightful comedy at the Opera House this weekend.

The coat came wafting out of heaven to her while she was riding to work on top of a bus and virtually took possession of her. It lost her job for her, won her a lavish suite in a fashionable hotel, led her into all kinds of difficulties and wound up by winning her a husband—handsome Ray Milland.

"Easy Living" is all smart, gay, sophisticated fun, with a brilliant cast which includes Edward Arnold, Luis Alberni, Mary Nash and over a score of other noted players.

The story begins when Arnold, the "Bull of Broad Street," quarrels with his wife, Miss Nash, over the purchase of a coat, high in their penthouse home. In a moment of rage he hurls the coat down into the street. It falls into Miss Arthur's lap and from then on things begin to happen thick and fast, with repercussions on the stock exchange, the police department and an automatic restaurant where Milland, Arnold's son who ran away from home to make good, is employed. Milland wins Miss Arthur after a whirlwind courtship of forty-eight hectic hours.

Knox United Church Notes.

The minister will be in charge of the service next Sunday and he will continue the series of sermons on "What Has Christianity to Say—About the Social Order?" A cordial invitation extended to all.

Evangelical Church Notes.

Our morning theme next Lord's Day will be, "The Consecrated Life." In the evening we will begin a series of Travelogue Sermons. In this series we will follow Jesus from place to place and observe the happenings of the last few weeks of His life. The pastor, who has visited many of these places, will attempt to have you see them through his eyes. A cordial invitation to all.

WEEKLY DOKE

Young man in bus: "Excuse me, madam, but you're treading on my feet."

Old lady (strap-banging): "I know that, but if you were a gentleman you'd be standing on them yourself."

Cards of Thanks

It is our sincere desire to thank our many kind friends and neighbors who in various ways came to our aid in the hour of trial and bereavement. Also for all the floral tributes.

A. H. Dedels and Family

To our many friends who, with their kind expressions of sympathy and the many floral tributes, comforted us in our very sad bereavement, we wish to extend our sincere thanks. We wish also to thank the Junior Girls' Choir who so beautifully sang "Come Unto Me."

Mrs. J. A. Mjolsness and Family.
